

Fixture Sets P50355A and P50495A

Three precision welding fixtures are designed exclusively for use with Weld-Pro™ Custom Lockrod Assembly Kits. The fixtures allow for the construction of a fully assembled lockrod in minutes with minimal welding (only six straight 1" welds assemble each lockrod).

Fixture Set P50355A (shown)

Fixture set P50355A is used with HD-VL assembly kit P50325A and fixture set P50495A is used with HD-HD assembly kit P50475A.

- Professional quality welding fixtures assure precise assembly for accurate lockrod timing.
- Fixtures are brass investment castings that allow easy welding, low maintenance and long life.
- Compact 3-piece fixture set may be used on any flat, straight surface.
- Detailed assembly instructions with photographs are included.
