Cargo Security

Security Plus™ Anti-Theft Plates

These plates are bolted to the door under the guide plates used to secure the lockrods. Once a padlock is attached through the Anti-Theft Plates, it is protected from bolt cutters and hacksaws.

Security Plus Anti-Theft Plates are Hot-Dip Galvanized.

Security Plus™ Anti-Theft Plates installed

Lock placement

Specialty products round out our variety of trailer/container solutions.

Features

- Location near the bottom of the door for easy accessibility
- Uses existing guide plate bolt holes
- No additional holes to drill that would allow water intrusion into the door panels
- With fewer holes and fewer fasteners, manufacturing is streamlined
- The Anti-Theft Plates are added at the time of lockrod installation

Part	Description
P43715	Anti-Theft Plate Left-hand
P43725	Anti-Theft Plate Right-hand
P50630	Anti-Theft Plate Kit

Anti-Theft Plates are available in three different spacing options:

1. Fits lockrods spaced at the standard 11-3/8 inches from each other.
2. Custom spacing, for customer specified lockrod centers.
3. As stand-alone units mounted elsewhere on the door.
