

## Cargo Security

*Powerbrace offers several products that are designed to help keep your transport cargo secure. These theft deterrent products may be used individually or in combination to provide maximum protection.*

**Theft Deterrent Plates Applied**

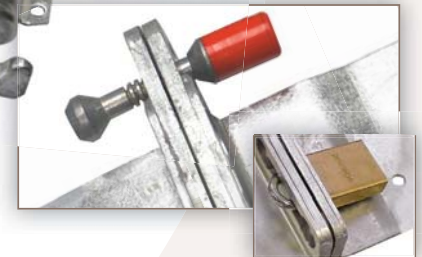

United States Patent #638,1554

### **Security Plus Theft Deterrent Plates**

These plates are bolted to the door under the guide plates used to secure the lockrods. Once a padlock is attached through the Theft Deterrent Plates, it is protected from bolt cutters and hacksaws. Advantages of the Theft Deterrent Plates include:

- Location near the bottom of the door for easy accessibility
- Uses existing guide plate bolt holes
- No additional holes to drill. Limits water intrusion into the door panels
- Fewer holes and fasteners mean streamlined manufacturing
- The Theft Deterrent Plates can be added at the time of lockrod installation or can be retrofitted to existing trailers

**With security seal attached**

**With padlock**

Three different spacing options:

- 1.** Fits lockrods spaced at the standard 11-3/8 inches from each other.
- 2.** Custom spacing, for customer-specified lockrod centers.
- 3.** As stand-alone units mounted elsewhere on the door.

## Cargo Security *(continued)*

### **Secura-Cam/Keeper**

This security option provides a way to secure the door seal directly at the cam and keeper, instead of at the lockrod handle. Holes are provided through the cam and the keeper, which line up when the lockrod is in the closed position. The security seal is then attached through the cam and keeper, making the door impossible to open without the seal being broken.

- Compatibility with DL or CT lockrod models
- Accepts barrier and integrity seals
- Requires only one RH Secura-Cam/Keeper Assembly per end-frame

Secura-Cam/Keeper

### **Interior Theft Deterrent Plate**

The Interior Theft Deterrent Plate is stiffer and lighter than conventional non-ribbed plates, providing added strength and security.

- Easy bolt-on installation with standard door fasteners and tools
- Hot-Dip Galvanized for resistance to corrosion

Interior Theft Deterrent Plate

### **How Can I Best Protect the Security of My Shipment?**

Powerbrace offers several products that may be used individually or in combination to provide maximum cargo protection.
